The 1930
McLAUGHLIN
-BUICKNew
Road shock
Eliminator
.. and New
Steering Gear

make McLaughlin-Buick the easiest car in the world to drive!

Imagine being able to travel the roughest road at any speed with the greatest ease and comfort! Such are the fine results of two matchless new quality features in the 1930 McLaughlin-Buick—a wonderful new frictionless steering gear, and the new McLaughlin-Buick steering shock eliminator! The steering shock eliminator absorbs jolts and jars and prevents their transmission to the driver's hands.

The new McLaughlin-Buick steering gear, of the effective worm-and-roller type, assures instant, effortless response to the driver's every wish. Drive this new McLaughlin-Buick. Test these twin features of comfort which make the new McLaughlin-Buick the easiest steering automobile in the world.

Winter Wuerst Material

Altho the trapping season hasn't legally opened as yet, Main street north was the scene Saturday morning of a mild excitement when the dog trappers tried to capture a Weiner hound which had been making its headquarters in the vicinity of a nearby eatery. After a search for the right dog, he was sighted and the round-up begun, with the usual rodeo vocal accompaniments. When captured, the poor canine was fitted with leg irons and chained in the rear compartment of the caravan. There is said to be a possibility of a raise in the price of sausage, as the steady decrease in the supply of raw material is "viewed with alarm" by wuerst-makers.

This Year's Crop

The view is generally held now that the gloom which overshadows farming districts in general during the late summer regarding the fate of this year's crop, was rather premature.

With few exceptions, when the final returns come in, it will be found that the compensation the grain-raiser receives for his labor will compare favorably with that of any in recent years.

As usual, when farmers get together, arguments are heard as to the better methods of farming to secure maximum results, but it is generally conceded at present that the crops on breaking, fallow land and properly cultivated old soil came near 100 per cent up to expectations this season.

Many cases, taken at random, could be cited in support of this statement. One farmer, for instance, a short distance from Stony, from a 60-acre field threshed over 1200 bu. machine measure, and received a grade 2 for this.

The contributory causes to the prosperity are said to be, a lessening of the help required at harvest time; the wheat so far hauled grading much higher than usual; and the better price obtained for same.

Among the cases observed of those who have practised new economies in farming methods is that of Pitzler Bros., at Inga. With the aid of their new combine harvesters the pair are credited with harvesting and threshing the grain from 400 acres. 175 acres of this was wheat, a sample of which shows a good weight and grade. Their new farming method eliminated the need of twine and also the costly stookers; and, what was of interest to the house-keeper, there were no hired help to cater to. The various crops were garnered without any outside help, altho the weather at the time was none too favorable for the operation.

Removal Of Friction and Strife

The setting up of the organization of the League of Nations had, as its main object, the removal of those racial, religious, economic and political animosities and suspicions which kept the nations of the world, and particularly the nations of Europe, in constant turmoil and ever on the verge of war. Because of the bitterness and suspicions thus kept alive and active, all nations armed to the teeth, one against another, while a multitude of restrictions and prohibitions to international intercourse were established.

Not only were national boundaries marked by lines of fortifications, but intricate systems of espionage were maintained, passports were required of people passing across boundary lines, different gauges were built by railways, customs posts established everywhere, and hostile tariffs imposed by one country upon the products of other countries.

Thus were the people of each country kept warring against the possible enmity of other countries, suspicions were never allowed to die down, a constant state of friction prevailed, and strife was uppermost in every mind.

It was as inevitable as the rising of the sun that such a state of mind among the peoples of the world must end in some gigantic conflict. It came in 1914, and all but ruined mankind, and nearly destroyed civilization. The statesmen of the world realized that unless something was done to remove these suspicions and causes of friction, it would be only a matter of time until another and still more colossal struggle would take place.

When it became operative, the League of Nations further realized that, if disarmament was to be brought about, armies and navies reduced, and the huge drain on mankind for warlike purposes ended, the real causes of war must be removed, suspicions lulled, and a true understanding developed among all people. In other words, that a proper spirit of international goodwill must replace the existing narrow and blatant nationalism, rampant everywhere.

The League, therefore, set up the International Labor Office, with the object of improving the lot of workers in all countries, and to raise the standard of living of the masses of the people everywhere, realizing that, if people are contented and happy, and living under a fairly high standard, they will not be suspicious or jealous of others, nor quite so ready to plunge into war to better their own condition.

In like manner, the League has devoted its attention to many causes of sorrow and unrest in the world, and it is persistently seeking improvement in all departments of the world's work and methods of living.

It is because of many really great achievements in these directions, coupled with the horrors of the last war, that the minds of all people are today more open to receive and support plans for disarmament, and that, with the passing of the years, the prospects for permanent world peace become brighter.

World statesmen are now convinced that the greatest danger to the world peace is to be found in the realm of economics, in the rivalries of nations in the field of trade and commerce. This is the age of big business, the age of mechanics, mass production, and of endeavour to sell the surplus products of one nation in the markets of other nations. While this has been more or less true of all ages, and wars have been waged in order to seize territory with a view to later commercial exploitation or development, today the urge to secure new and larger markets is the strongest ally of those who clamor for large armies and huge navies.

Premier Bland's proposal for a United States of Europe is economic, rather than political. We venture to say it is not aimed at Great Britain, or the United States of America, but is designed to remove the multitude of restrictions which prevail all over Europe, isolating one nation from another, and doing economic hurt to all of them.

So, too, the Franco-British proposal for a two-year tariff holiday during which all nations would agree not to raise their tariffs, and meanwhile participate in a sincere international conference to determine ways and means whereby, without sacrificing the interests of any one country, a larger measure of freedom in trade and commerce, and intercourse generally, could be devised.

The world is coming to realize and fully understand that trade barriers are now the most prolific cause of misunderstanding between nations, and the cause of more friction and heart-burning than anything else. Even Canada and the United States, which live side by side in such mutual understanding and goodwill, are more frequently disturbed over tariffs than any other one thing, or all other things put together.

The ideal condition of world free trade may be an impossible dream for some generations to come, but surely much of the present friction can be removed, and the world begin to trace the path that leads to the ultimately desired goal.

FARMER'S WIFE GETS STRENGTH

By Taking Lydia E. Pinkham's Vegetable Compound

Wilton, Ont.—"I am taking Lydia E. Pinkham's Vegetable Compound because it has brought me back to normal life. It helps me and I can praise it too highly. I was troubled with heat flashes and my limbs were heavy so I could hardly perform my farm work. I saw in the newspapers your ad about the Vegetable Compound and thought to give it a trial. The first bottle gave me relief and I have told others what it does for me. I am willing for you to use my letter if you choose." Mrs. D. B. Fessenden, Wilton, Ontario.

Ask Your Neighbor

Accelerated Schedules Feature C.P.R. Fall, Winter Time Table

New Schedules To Be In Effect Sunday, September 29th

The fall and winter time table of the Canadian Pacific Railway which will go into effect over the system on the last Sunday of September, features many important changes in passenger train service, among which is the speeding up of transcontinental trains, saving the coast traveller a matter of ten hours. These improved schedules are in line with the Company's policy of keeping abreast of the times and providing the best possible service to its patrons. The Company's ticket agents are now in possession of complete information, which is available to the public upon application.

A census is to be taken in more than 200 countries and colonies next year.

Postal Revenue

Now On a Level With What It Was Three Years Ago When Letter Rate Was 5 Cents

Postal revenue is now on a level with what it was three years ago despite the return to the 2 cent letter rate (in Canada, the United States and Mexico) in 1926, and that within the Empire on Christmas day, 1928. For the fiscal year ended March 31st, 1928, the revenue was \$31,025,000, and for the fiscal year ended March-1st, \$31,170,000.

RHEUMATIC PEOPLE CAN OBTAIN RELIEF

By Enriching Their Blood With Dr. Williams' Pink Pills

Rheumatism is a disorder of the blood. It attacks people when the blood is thin and impure, thus setting up inflammation of the muscles and joints. Wet or cold weather may start the pains of rheumatism, but it is not caused by them. The blood, hot applications or rubbing with liniments may ease the pain, but do not remove the cause. The pains are soon back again. To get rid of this most painful trouble you must first enrich the blood. This is the purpose nothing else can equal Dr. Williams' Pink Pills, which from first to last, actually make new, rich blood, thus driving the rheumatic poisons from the system. Mr. Henry E. Amiro, Lower East Public, N.B., tells what these pills did for him. He says:—"I had a bad case of acute rheumatism so bad that I could not walk a hundred yards without so much suffering that I would feel faint. I could not do the least work, and my movement caused great pain. I was under the care of a doctor but did not improve much. Then reading of a similar case in a newspaper I decided to try Dr. Williams' Pink Pills. By the time I had used three boxes, there was no doubt they were helping me. I took altogether about a dozen boxes when I was entirely relieved of the trouble, able to walk four miles to my work, chop wood all day, and then walk home again. To anyone suffering from rheumatism I can strongly recommend Dr. Williams' Pink Pills." You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Greatest Wheat Exporters

Canada Stands At Top Of The List As Exporter Of Wheat

Canada stood first as an exporter of wheat during the 1927-28 crop year, with exports of 255,062,278 bushels. The United States came second with exports of 168,307,000; Argentina, third, with 155,355,000 and Australia fourth, with 80,980,000 bushels. The report of the Bureau of Statistics also shows that for 1927-28 the world's wheat production was 4,815,400,000 bushels, of which Canada produced 479,665,000 bushels ranking third with Russia in the first place and the United States in the second.

When Asthma Comes do not despair. Turn at once to the help effective—Dr. J. D. Kollogg's Asthma Remedy. This wonderful remedy will give you the aid you need so sorely. Choking ceases, breathing becomes natural and without effort. Others, thousands of them, have suffered as you suffer but have wisely turned to this famous remedy and ceased to suffer. Get a package this very day.

Bananas are banned in Italy because they do not grow in that country or in any of its colonies. This is protection carried out to the limit.

Worms in children, if they be not attended to, cause convulsions, and often death. Mother's "Gravel" Worm Extremator will protect the children from these distressing afflictions.

Apples imported into England from Australia must in the future measure not less than two and one-quarter inches in diameter.

Tired Feet

Bathe with Minard's in warm water, rubbing into aching parts. Soothing and relieving.

Daring Stunt Flyers

"Four Musketeers of the Air" Duty Death At Camp Borden

"Four Musketeers of the Air" is the title accorded a small group of Canadian aviators who are rapidly demonstrating to the world that while Canada's air force may not be the largest, it is very nearly, if not the best, at its own particular game. The Musketeers are Squadron Leader C. McEwen, M.C., Flight Lieut. David A. Harding, famous rugby player, Pilot Officer E. McNab and Pilot Officer E. A. McGowan, all four being stationed at Camp Borden, and flying the Canadian army's Slakin pursuit 'planes'.

At various exhibitions both here and in the United States, the Musketeers have thrilled thousands with their antics. At Cleveland, Ohio, recently, they stole the thunder from many more famous fliers who had performed there, and their performances were regarded as one of the most remarkable ever seen in the United States.

Camp Borden features individual stunting at the finishing part of a novice flyer's education. It is a means of obtaining perfection in the control of an aeroplane, and while formation flying is also taught and practiced, the individual practice of putting an aeroplane through its paces is more strongly endorsed.

One of the Musketeers' favorite stunts is a very spectacular one. The 'planes, starting in formation at around 3,000 feet, suddenly nose down. At terrific speed, with motors wide open, they spread out, fan-shaped, and suddenly zoom up. At the peak of the climb, with the motors nearly stopped, the 'planes gradually fall over backwards and fly for some distance upside-down.

Stop Colds with Minard's Liniment.

Visitors to the home of Charles Darwin, in Kent, England, may now see the chair and writing board at which Darwin worked while writing his famous theory of evolution.

Rubber can be obtained from more than 300 varieties of tropical trees.

All These Advantages For Farm Construction

For both old and new construction Gyproc gives more advantages than any other material. Makes durable, permanent walls and ceilings in less time and at less cost. Cannot warp, crack, shrink or burn, and is ideal for lining houses, garages, poultry houses, barns, grain bins and all other farm buildings.

Sheep Ranching Expanding

Industry Is Showing Promising Development In British Columbia

The sheep industry from a ranching point of view shows signs of development in Western Canada, particularly in British Columbia, states the Department of Agriculture. Last fall upwards of 10,000 head of ewe stock were bought in Alberta and shipped to the interior points of British Columbia. In 1928, the demand for range ewes exceeded the supply and the demand promises to be equally as good this year.

Migration of British Juveniles For Farms in Canada is One of Promising Features of Immigration

The migration of British juveniles for farms in Canada, is one of the most promising features of the immigration situation at the present time," stated R. M. Pym, superintendent in Britain of juvenile immigration for the Colonization Department of the Canadian National Railways, who arrived in Montreal on the White Star liner, "Laurentic," for the annual conference of National Railway Colonization department officials.

Mr. Pym arrived with the final party of British juveniles for the season, numbering some 83 boys, and commenting on the amazing development of juvenile immigration from the British Isles, Mr. Pym stated that altogether this season a total of 1,150 boys had been brought out under the auspices of the Canadian National Railways. This was an increase of 131 per cent. over the season of 1928, and when it was considered that 1928 season showed an increase of 94 per cent. over 1927, it could be realized to what a great extent juvenile immigration had become a factor in the general situation.

More than 1,000 of the boys coming forward this year, were placed by the British Immigration and Colonization Association of Montreal, on farms throughout Ontario. The balance have been placed by other organizations in both eastern and western Canada. "About 97 per cent. of these boys have definitely made good," said Mr. Pym. "Something like one half per cent. have had to be deported, while the remaining small percentage might be said to be still on the fence, with respect to their desire to stay in this country."

Generally speaking, the boys come from good middle-class families and many of them are fairly well educated, bright and enterprising and eager to make a career for themselves in the new country.

"One of our greatest difficulties, in juvenile immigration work," said Mr. Pym, "has been the prevalence of the old idea, still persisting in the Old Country, that boys and young men were sent to colonies only as a last resort, if they were wayward or criminally inclined. It is surprising to what extent that idea still persists, and it is only gradually that we are replacing this with the true idea that Canada is a wonderful land of opportunity, and that British boys and Britishers in general are welcome here and that in this country they may build for themselves a future not possible in the old world."

"The juveniles movement has become very popular and the prospects for next season are exceedingly promising," stated Mr. Pym.

Women Explorers

Three young women, Baroness Christina von Bradenstein, Miss Nedra de Namur, and Miss Margaret d'Angelo, recently set out from New York to explore Alaska, the Gobi Desert, and the wilds of Australia. Loaded in the back of their car they had a tent, three army cots, a motion picture camera, an ordinary camera, a typewriter, a camp stove, and a German shepherd dog.

"When we were first married you were only too glad to wipe the dishes."

"I know, but that was when we only had two dishes."

"My wife examined my pockets last night."

"What did she find?"

"What all explored and material for a lecture."—Outlines, Madrid.

W. N. U. 1804

Portable Hog Cabins

Small, Movable Cabins Will Be Found Of Great Advantage

While a substantial hog pen is necessary on a farm where pigs are raised to any extent, it is of great advantage to make use of small movable cabins, particularly for housing brood sows under winter conditions or under summer conditions when on pasture. The small cabins are also useful as a shelter for growing pigs in summer when on dry lots or pasture. The Dominion Animal Husbandman, in his report for 1928, published by the Department of Agriculture, at Ottawa, recommends a cabin with a floor area of fifty square feet. A cabin of this size will comfortably house five adult brood sows when fed outside and given the run of the yard. Such a structure has been found at the experimental farms to be inexpensive and in many instances may be constructed from material which is found on the farm. The A-shaped cabin popular some years ago, has lost favour at the experimental farms, as the sloping roof is apt to be broken away by the hogs when crowding inside. The walls should be perpendicular for three or four feet with a rigid roof above.

YOUTHFUL COTTON PRINT

All the smart young folk are making their morning and sports frocks of cotton fabrics, because they are so easily made, and the cost a mere trifle. Take the model illustrated in red and white printed pique with vivid plain red bias binding emphasizing scalloped outline of side closing bodice, and edge of kimono sleeves. Why it is made in less than two hours! Only a few seams to join! Style No. 555 comes in sizes 14, 16, 18 and 20 years. Made in plain white pique for teens. It will appear quite different. Peach shantung, gingham check in orchid and white, yellow sportswear, linen, orange silk crepe, capucine tones in printed lawn, voile in pla check in green and white, and white angora wool jersey are stunning ideas. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

The Combine Harvester

No Reason Why Combine Cut Grain Should Not Grade As High As Grain Cut By Blader

About 600 cars of average grain crop may be harvested in a season by the modern combine reaper-thresher having a width of cut of 15 or 16 feet. On the same basis a machine cutting a 100 foot swath would handle about 400 acres. These figures have been arrived at in seven years' experience with the combine reaper-thresher at the Swift Current, Saskatchewan, experimental station.

The results of this experience with work done not only on the station, but on many farms throughout the province, are presented in Bulletin No. 118, of the Department of Agriculture, at Ottawa. Most of the combines included in this study threshed the wheat as it was cut, while others were equipped with a window harvester and picker. In using the combine it is shown that caution must be observed in the date of commencing its use and proper recognition must be taken of the effect of even light showers, dew, and white frost on standing grain. When all these precautions are intelligently observed, the officials of the stations, who have been studying the question, feel that there is no good reason why combine cut grain should grade lower than blader harvested grain.

Practically all cases of toughness and dampness arising from the use of the combine are believed to be due either to a too early start, or to harvesting only in the day following a night of dew or white frost.

Mrs. Soap: My husband has left me. He ran away with our maid.
Mrs. Suds: How terrible! Isn't it?
It is so hard to find servants now.

There are 7,000 miles of water-mains in London.

Various Live Stock Organizations Are Being Called Upon For Increased and Better Production

Value Of Research Work

Once Destructive Agent Now Used As A Fertilizer

The feat of making two blades of grass grow where one grew before has been excelled by researches conducted at the smelter, at Trail, B.C. Hitherto the sulphur dioxide fumes, highly destructive of vegetation, have made the districts about such works a wilderness. Lawsuits were the only productive crops on the farms roundabout, and the company had to pay large sums in damages to the farmers. Similar trouble was experienced in the neighborhood of the nickel smelters in the Sudbury district.

Chemists were put to work to find a remedy. They have not only done this, but have discovered an unexpected value in the harmful fumes. A process has been evolved whereby what was once a destructive agent can be utilized in the manufacture of a fertilizer for which there is said to be an unlimited market on the prairies.

The announcement of the discovery includes a statement that a plant to cost seven or eight million dollars will be built at Trail for the manufacture of this chemical fertilizer. It will call for large additional electrical development, so that business generally will be stimulated.

The incident illustrates the far-reaching value of chemical research. It vindicates the expenditures which Ontario and the Dominion have undertaken in this direction.—Toronto Telegram.

Sheep and Lamb Fair

Manitoba Sheep Breeders To Hold Annual Show At Brandon

Preparing the way for a sheep and lamb fair this autumn that will be even larger than a year ago, the directors of the Manitoba Sheep Breeders' Association have fixed October 30 and 31 for the annual show. As usual, the fair is to be held in the Winter Fair Arena, at Brandon, and on a scale that will attract wide attention. A year ago there were 600 lambs entered in the show which is fast reaching record proportions, and the directors anticipate a larger entry this year because of more favorable conditions. The recent movement in the province to place sheep on Manitoba farms is expected to lend considerable interest to the Brandon show.

Winnipeg Grain Exchange

Membership in the Winnipeg Grain Exchange has been raised to \$50,000. A resolution that the cost of membership be raised to this figure was carried unanimously at a meeting of the Grain Exchange on August 27th. The last membership was sold for \$28,700.

Winston in the West

Rt. Hon. Winston Churchill who is touring Canada over Canadian Pacific lines, inspected oil developments in Alberta and is here seen looking at the frost-covered pipes that convey the oil from the Home Wells, in the Turner Valley to the separators. He was accompanied by his brother, Major Churchill, and his son Rudolph. Inset shows, Mayor Osborne, of Calgary, and Mr. Churchill leaving for the oil fields.

Every exhibition and various live stock organizations receiving federal government aid are being called upon to boost for increased and better production. Hon. W. R. Motherwell, Minister of Agriculture, sounded that note at the National Exhibition in Toronto, and it will be repeated from one end of Canada to the other.

The Department of Agriculture is convinced that Canadians have mighty appetites, and as a result, they are eating much of the produce that used to go for export. In the face of an increase of 148,000,000 dozen eggs per annum last year, over the total of 1920, Canadians consumed so many that there was scarcely enough left for export to balance the eggs imported during the winter months. Accordingly Canada is now practically off the map as an egg exporting country. Canadians per capita have a considerable lead over any other people in the world in the consumption of eggs.

The situation with regard to butter is practically the same. It is claimed that in proportion to its population, Canada beats the rest of the world in the amount of butter it uses. So in spite of a steady increase in production there is no butter to export. Poultry and lamb are also in the class of products which Canada grows great quantities and now consumes all.

Canada's exports of bacon are falling off at the rate of about 30,000,000 pounds a year. If it keeps up in two years she will be off the export market although the hog population is greater than it was ten years ago.

The Department of Agriculture is accordingly trying to step-up production in the above commodities. It is urged that this is a time of big production in every other line of activity. Farmers and their families want more than they used to expect in the way of luxuries, and the farmer to pay for these must produce on a greater scale than when his wants were less pretensions.

Many reasons are given for the increase in food consumption by the people of this country. It is claimed to be increasing faster than the growth in population. The great influx of United States tourists is given as one reason. Another is the development of outside or semi-outside occupations such as the paper mills and the mining industry, where workmen as a rule eat more than at inside jobs. Then Canadians are a busy people and busy people, Mr. Motherwell said in an interview recently, eat more than loafers.

Importation Prohibited

Ban Is Placed On Cattle From Scotland, Owing To Outbreak Of Foot And Mouth Disease

A ministerial order signed by J. H. Grisdale, Federal Deputy Minister of Agriculture, cancels all permits for the importation of cattle, sheep, goats and other ruminants and swine from Scotland to Canada. The only exceptions to this order are those already embarked on vessels en route to the Dominion. The order is under the provisions of the Contagious Diseases Act, and is made on account of an outbreak in Lanarkshire, Scotland, of foot and mouth disease. Similar restrictions are in effect regarding shipments of these animals from England.

In a few years malaria has reduced the population of the town of Birnagar from 80,000 to 2,300.

Diamonds From Sugar
Scientist Produces Sparkles That Was Made In Laboratory
Predictions that "large and beautiful real diamonds can be made by man, was made to the American Chemical Society, at Minneapolis, by Professor J. Willard Hershey, of McPherson College, McPherson, Kansas.
He laid on a glass slide a tiny crystal, the size of a grain of sand. He said it was a real diamond, produced in his laboratory at McPherson. It was made from ordinary pure table sugar subjected to pressure estimated at ten tons to the square inch.

**WHEN BABY IS WELL
MOTHER IS HAPPY**

The happy mother is the one whose baby is well—it is the laughing, gurgling baby who always brings joy to the home. When baby is ill everyone in the home suffers—not only through worry over the little one but through loss of sleep—no one can find rest with a sick baby in the home. Thousands of mothers are happy mothers because they have found the way to keep their little ones well—or if sickness does come on suddenly, as it usually does with little ones, they have found the way to speedily bring the baby back to health again. Mrs. George Keck, Lindberg, Alta. is one of these mothers and she writes as follows:—
"I am the happy mother of a seven-month-old baby girl. Baby is healthy and strong and sleeps well at night. I give her no other medicine but Baby's Own Tablets, and she just loves them. I am never without the Tablets in the house."

Baby's Own Tablets are a mild but thorough laxative which regulate the bowels, sweeten the stomach and give relief from constipation, indigestion and make the cutting of teeth easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

**French Bakers Celebrate
Commemorated Four Hundredth
Birthday Of the Doughnut**

This generation has an evident fondness for anniversaries. People like them, and seek causes for holding them. Therefore, no person can object when French bakers decide to commemorate the 400th birthday of the doughnut.

The first example of the famous confection was made in Paris in 1629. Some time later it got passage over the Channel into England, and from there made its way with household effects and other ideas to this continent.

The first doughnut, we read in the Christian Science Monitor, was shaped like a crescent. That is, of course, interesting, but is of comparatively little importance. The real truth will come with the name of the genius who first took a hoe and moulded the doughnut round the vacant space.

Painless and perfect in their action, Miller's Worm Powders are always a safe and reliable remedy for children who show symptoms of worms. These symptoms are easily recognized in a feverish restlessness, frequently ending in convulsions. A point of notable importance is that after Miller's Worm Powders have expelled the worms, the stomach and bowels are toned up into a very healthy condition.

Research Possibilities

By Dr. H. M. Tory, President National Research Council

No one can realize what may be before us. I saw a statement made by a distinguished professor of chemistry that if we could write down the formulae for all combinations possible from a molecule containing one hundred atoms, these formulae alone would fill all the pages of all the books in the world. He was giving that as an illustration of the wide open field that lies before the chemists of this country in developing its chemical industry. Fifty years ago, there was no such thing as a strictly chemical industry. Last year in Canada alone there were invested in chemical and allied industries \$750,000,000 which produced \$500,000,000 worth of products, while in the United States the corresponding production amounted to approximately \$7,000,000,000.

Consider the postage stamp. It sticks until it delivers the goods.

**Women In Airplane Factories
Are More Adept At Finer Adjustments Than Men**

Much of the most exacting work in the construction of an airplane is done by women workers. Builders have found that women are most adept at shaping and sewing the fabric covers of wings and making certain delicate adjustments on the wings and struts of airplanes. Also, they are often called upon to plan the decorations of the interiors of planes built on special orders.

Major Reuben H. Fleet, president of Fleet Aircraft, Inc., of Buffalo, has many women workers in his plant. "We find that women can do the complicated work of covering the wings and assembling the ribs and fitting them more accurately and in less time than men," he said.

**Had Diarrhoea
Bowels So Active
Feared For His Life**

Mrs. S. J. Jago, Canohle, N.B. writes:—"My little boy, when three years old, had a severe attack of diarrhoea. The bowels were so active and he vomited so much. I feared for his life. I tried many medicines, but he was always getting worse. A friend told me of

**Dr. Fowler's
EXT-OF
WILD
STRAWBERRY**
and after the second dose I saw an improvement. I gave him almost half a bottle and he was completely relieved. I have used it for the other children, and my husband and myself. My husband gives it great praise, and when he gets away from home to work he always takes a bottle with him. Put up only by The T. Millburn Co., Ltd., Toronto, Ont.

Natural Gas Exploitation

Exploitation of the district along the South Saskatchewan River, in the neighborhood of Riverhurst, with a view to ascertaining the possibilities of natural gas is to be undertaken on a more extensive scale within the next few weeks, it is reported.

Many have been relieved of corns by Holloway's Corn Remover. It has a power of its own that will be found effective.

The man who feels a small job beneath him is invariably too small for a bigger one.

Only choice leaves grown at high altitudes go into the blending of Blue Ribbon Tea. That is why its flavour is so uniformly excellent. Insist upon getting it from your grocer—refuse substitutes of inferior quality.

**SUNDAY SCHOOL LESSON
SEPTEMBER 29
SIGNIFICANCE OF THE EXILE
AND THE RESTORATION**

Golden Text: "The lovingkindness of Jehovah is from everlasting to everlasting upon them that fear Him, and His righteousness unto children's children."—Psalm 103:17.

Before the destruction of Jerusalem, the prophet Ezekiel went into exile with the first deportation, and five years afterwards he was called to the prophetic office. It was an arrangement of the people of Israel that he was to make in the name of the Lord. Ezekiel lived up to his responsibility. Do we live up to ours? It is one thing to have convictions, but quite another thing to have the courage of convictions. A responsibility calls for a response. Not to respond to the responsibility that rightfully belongs to us is cowardly and base.

The captivity was God's training school, where the exiles were given an opportunity to lament their rebelliousness and recognize their dependence upon Him. Jeremiah had prophesied that after seventy years were accomplished, God would visit and perform His good word toward them, in causing them to return to their home. The first opportunity for return from exile came in the first year of Cyrus, King of Persia. Jehovah stirred up the spirit of his king to make a proclamation permitting any who wished to go back and build the house of Jehovah.

The chief desire of the returning exiles was to rebuild the temple and re-establish their ancient worship. It was a great day when the foundation of the temple was laid, vocal and instrumental music formed part of the ceremony, and joy reigned supreme. But while there was joy in all hearts, conflicting emotions filled the hearts of the men who had known the glorious temple of Solomon. They were weeping as well as rejoicing. Life has many such scenes, when the bitter mingles with the sweet. One of Tennyson's odes refers to a wedding and a white funeral of single life. "The foundation laying of that second temple in the midst of ruin and desolation was the old men and women of all the glories of the past."

**Juveniles To Compete
Boys' and Girls' Swine Clubs Membership Is Necessary**

More than five thousand boys and girls on Canadian farms will be taking part in the annual swine club and calf breeding contests in the various provinces this year, for which the Canadian National Railway offers prizes and trophies. It was stated recently by Dr. W. J. Black, Director of Colonization and Agriculture, of the National System. Through the stimulation of the assistance offered in this work by the railway company, in bringing the boys and girls together in annual competition, the work of the clubs has progressed rapidly, particularly with respect to calf clubs. There will be nearly 200 of these in operation this year, there being a 400 per cent. increase over last year.

Wheat Marketing On Protein Basis

Dr. Robert Newton, professor of field crops, of the University of Alberta, has been asked by the National Research Council, of Canada, to make investigation of the possible reception which would be given in Europe to a system of marketing wheat on a basis of protein content. The report will be prepared for the next session of Parliament.

Minard's Liniment—Used for 50 years.

**Huge Milk Shipment
Largest Consignment Of Its Kind
Shipped From Aylmer To**

Seven hundred and fifty thousand cows working in high gear for one whole day could contribute just enough milk to make up a shipment which left Aylmer, Ont., on a special Canadian National Railways freight recently for the west. Product of an Aylmer Milk Evaporating Company, it was the largest shipment of its kind ever to leave any point in Canada, and made up a train consisting of 200 cars. There were 11,880 cases containing 700,000 cans and weighing 353 tons in the consignment which is destined to grace the tables of farm houses during coming season. It required 1,500,000 pounds of fresh milk to make up this shipment at the largest evaporated milk plant in Canada. The product has a value of \$65,000 and is pointed to as a sterling example of an extension of the dairying industry in Canada.

Although a small part of the shipment will reach the Pacific Coast, it is, in the biggest part, for consumption throughout the prairie provinces.

It Has Many Qualities.—The man who possesses a bottle of Dr. Thomas' Electric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

Married women in Dallas, Texas, are not permitted to hold positions outside their homes, unless there are "especially mitigating circumstances."

James Fenimore Cooper could not write unless he was chewing gum drops, it is said.

NEVER wait to see if a headache will "wear off." Why suffer when there's always Aspirin? The millions of men and women who use it in increasing quantities every year prove that it does relieve such pain. The medical profession pronounces it without effect on the heart, so use it as often as it can spare you any pain. Every drugist has Aspirin. The prompt relief of a headache, cold, neuralgia, lumbago, etc. Familiarize yourself with the proven directions in every package.

ASPIRIN
Aspirin is a Trademark Registered in Canada

GMR Cylinder Head 58 h.p. BIG Six Engine Fuel Supply Pump

COMPARATIVE test . . . made with the "fifth-wheel" speedometer . . . prove Pontiac to have the highest top speed and fastest acceleration of all cars in its price range. Its 200-cubic-inch engine delivers 58 brake horse-power at 3,000 r.p.m. . . . exceptional power at moderate engine speed spelling long life for Pontiac's Big Six engine.

High-compression performance, with ordinary fuels is provided by Pontiac's GMR cylinder-head, developed by General Motors Research Corporation and available in no other car at Pontiac price. Positive fuel-pump assures full supply of gas and prevents starving on long, steep hills.

The only true performance is *all-around* performance . . . power, speed, acceleration and **LONG LIFE**. That is why Pontiac is worth more today than other cars at its price. Compare Pontiac's BIG SIX beauty, performance and dependability with anything this price field can offer . . . then make your decision.

IT'S BETTER BECAUSE IT'S CANADIAN

With an Autographic Kodak

the date and title may be written on each film at the time the picture is made.

This is accomplished by an autographic arrangement, a feature that is exclusively Eastman.

For pictures on the motor trip, snapshots of the children, in fact for almost any type of picture, the title, in the years to come, adds much—the date even more.

Photography expensive? Look at the price tags in our Kodak window—or better still look over the line. Expensive? You never got such lasting pleasure at so small cost.

* Kodaks \$9.00 up—Brownies \$2.00 up

J. F. Clarke, Agent, Stony Plain.

President and Directors on Tour

Inspecting hotels, resorts experimental farms and properties of the Canadian Pacific Railway, and great mining and industrial plants and agricultural conditions on the route of their journey across Canada from Montreal to Victoria and return, President

Beatty and directors of the railway are here shown on their arrival at the North Toronto station. From left to right the photograph shows Rt. Hon. Lord Southborough, W. A. Black, Sir George Garneau, of the Civil Service Commission, E. W. Beatty, chairman and presi-

dent of the system, Dr. H. A. Beatty, chief surgeon for the C. P. R., Ontario district, Sir Charles Gordon, Ross H. McMaster, F. E. Meredith and Dr. Charles F. Martin, dean of the faculty of medicine, McGill University.

Here and There

322. Canadian Pacific steamer Minnedosa recently brought over to Canada two fine stallions belonging to the Prince of Wales, "Aldebaran" an Arab, and "Crusader", a Clyde, to go the royal ranch at High River, Alberta. The two horses broke their journey at the Toronto Exhibition, and later were carried across the Dominion by Canadian Pacific Express. Special accommodation was provided for them on the Minnedosa.

Rt. Hon. L. C. M. S. Amery, secretary for the Dominions in the Baldwin administration, fulfilled his wish recently when he climbed Mount Amery, 10,840-foot peak in the Rockies, to accomplish which he had travelled some six thousand miles by Canadian Pacific Express of Australia and lines to Lake Louise from England. He fought his way through blizzards and many other hardships to the top of the peak. He was accompanied by a Swiss guide, Edward Feus, of Lake Louise.

"Mr. Churchill looked very funny working on one of father's threshing machines," said the Hon. George Rodney, aged ten, who with his younger brother John recently travelled to England to take up schooling. Winston Churchill is a cousin of Lord Rodney who operates a ranch at Fort Saskatchewan, Alberta.

The fourth game refuge has been established in New Brunswick by the provincial government at Beauséjour, consisting of 43 square miles located in Carleton and York counties. This makes a total in all of about 640 square miles of territory set aside in the province as game sanctuaries since 1913.

Hon. J. L. Perron, Quebec minister of agriculture, has announced the loan of two-thirds of the purchase price of pure-bred sheep, without interest charges, to Quebec farmers. He aims to place 25,000 pure-bred sheep throughout the province to bring in a yearly revenue of \$250,000.

A yield of 3,599,995 barrels of apples is expected in Canada this year, as compared with 2,750 in 1928. Compared with the five-year average of 2,985,210 barrels this is an increase of 20%, making it a bumper crop.

Homestead entries in the four western provinces continue to run well ahead of last year. For the half year they number 7,129 as compared with 5,165 in the same six months period of 1928. Alberta topped the list with 4,063 filings; Saskatchewan followed with 2281; British Columbia recorded 371 and Manitoba 325.

Sixty-three wells are being drilled in the Turner Valley, 59 miles south-west of Calgary. 21 are just about to be started and 25 are producing crude naptha or crude oil—a total of 112 wells. Mr. Winston Churchill, on his recent trip across the Dominion by Canadian Pacific paid a special visit to the Turner Valley accompanied by Mayor Osborne of Calgary.

Selection is announced of John W. Dufos, Editor of the Winnipeg Free Press, to act as a commissioner on the part of the United States on the International Commission under the Treaty for the Advancement of Peace between the United States and Germany. Mr. Dufos was selected for this post by the Advancement of Peace between the United States and Germany. The International Commission now being set up by the United States and Germany is to have five members, of which Mr. Dufos is the first to be named. All disputes between the United States and Germany, after ordinary diplomatic proceedings have failed are to be referred to the Commission.

Drive It... and let your own experience sell you

NO one who has sat behind the wheel of the New Chevrolet Six could ever be contented with less than the quality . . . less than the performance that this outstanding SIX provides.

For Chevrolet is the lowest priced six in the world with this remarkable combination of fine car features—

Body by Fisher, with deep, richly-upholstered cushions, Fisher VV Windshield, Tensored Fittings, fashionable Duco colorings, smartly beautiful design. Six-cylinder valve-in-head engine, of high-compression non-detonsating type, with the extra efficiency of "direct firing" and revolve-pick-up due to automatic accelerating pump. New design, ball-bearing steering gear, giving marvellous handling ease. Efficient braking system of non-locking four-wheel brakes and independent emergency brakes. Long semi-elliptic, shock-absorber springs, parallel with the frame. Modern Convenience Features, twin-beam headlights, foot-controlled, high-speed window regulators, indirectly-lighted instrument panel, including electric temperature gauges and theft-proof Electrolock.

And all these, plus the established economy and staunch endurance for which Chevrolet is famous, at the price of a four! Drive it and let your own experience sell you on Chevrolet Six!

THOMAS PLEASED WITH HIS RECENT VISIT TO CANADA

Liverpool, Eng.—"I am completely satisfied with the results of my visit," declared Right Hon. J. H. Thomas, Lord Privy Seal and Minister of Employment, on his return from a visit to Canada. "I hope and I feel that it will contribute towards a solution of the unemployment problem of this country this winter."

"I promise to meet representatives of all business interests which can do business with Canada, so the necessary steps can be taken to give practical effect to my efforts. Canada will take coal and steel from Great Britain which she at present takes from other areas."

"I have not asked Canada to take from us things she produces herself, but I did ask something on account of Britain being the largest buyers of wheat from the Dominion," Mr. Thomas went on. "Canada," he declared, "admitted the force of what he put forward."

"Although, as I say, I shall meet the business organizations of the old country, I say once again, as when I took office—there can be no infallible unemployment remedy produced artificially. What we want for that are customers, and these I have done my best to secure," Mr. Thomas added.

Entertained By Royalty

Premier MacDonald and Daughter, Isabel Guests At Sandringham Castle

Sandringham, Eng.—King George and Ramsay MacDonald, at together in the drawing-room of Sandringham Castle tonight and talked about whatever it is that a monarch and premier discuss when the latter is on the eve of a historic journey to the United States.

The Prince of Wales looked in for a short time before leaving the castle. The premier and his daughter Isabel were house guests tonight of Their Majesties and will probably motor back to London tomorrow.

Mr. MacDonald also had a long interview with the King this afternoon while Miss Isabel was talking with Queen Mary.

Damage To Chinese Property Enormous

Government Estimates Cost Of Russian Raids At \$25,000,000

Shanghai.—The Chinese Nationalist Government estimated damage to Chinese property from Russian raids of Manchurian border points at \$25,000,000, according to a Kuomintang semi-official agency despatch.

For three months the 2,000-mile Russo-Chinese border between Manchuria and Siberia has been the scene of sporadic fighting, the trouble starting over Chinese seizure of the Chinese Eastern Railway administration from the authority of the U.S.S.R.

Income Tax Collections

Ottawa.—Income tax collections are mounting. In the five months ending August 31, collections totalled \$60,292,142, an increase of \$9,311,918 over the same period in 1928. In August alone, according to the National Revenue Department's figures, collections were \$850,427, as against \$922,100 in August of last year.

Earthquake Recorded

Saskatoon, Sask.—The seismograph at the University of Saskatchewan, here, recorded a severe earthquake shock Sept. 17th. It was the most severe registered here in many months. The location of the earthquake could not be determined until compared with records from other points.

Army and Navy Veterans

Quebec.—The annual convention of the Army and Navy Veterans' Association opened here with more than one hundred delegates from various parts of Canada in attendance. Brig-Gen. Hon. W. A. Griesbach, of Edmonton, Alta., presided.

W. N. U. 1804

For Compulsory Pool

Aaron Sapiro In Favor Of Marketing System Without Limitation

Estevan, Sask.—"I am for co-operative marketing without reservation and without limitation," but above all I am for control of the commodity that the farmers raise by the farmers who raise it, and I am for the absolute elimination of even part of that control by those who have a financial interest in breaking down your great pools. I am for co-operation as a means to an end, that your own wheat by the farmers who end being the absolute control of raise it in whatever technical method they think is the best method of control."

Before 700 farmers of the districts tributary to the town of Estevan, Aaron Sapiro, America's most famous co-operative farming advocate, gave expression to these sentiments when, under the auspices of the local lodge of the Saskatchewan section of the United Farmers of Canada, he opened the first gun in the campaign now being started in favor of a settlement of one hundred per cent. pool by legislation.

Without equivocation of any kind, Mr. Sapiro announced himself as being wholly in favor of one hundred per cent. pool by way of legislation, and in the course of an hour's address gave reasons why such legislation should be sought, why the farmers of the province should market all their grain through a single control, and why those who are now outside the pool should be compelled by way of legislation to place their products through the single marketing organization.

Four questions were outlined by Mr. Sapiro as the basis of his address: first, do the farmers generally understand what is meant by the term "one hundred per cent. pool"; second, why was he brought to the province to advocate the method; third, what objections are raised to it; fourth, why are the reasons for legislation greater than those against it.

H.B. Line Now Ready

But Regular Trains Will Not Be In Operation Until Next Spring

The Pas, Man.—The Hudson Bay Railway is now in shape to allow regular trains to be run to Churchill with safety. It was learned here in official railway quarters.

The final two miles of ballasting of the "First Lift" were completed this week, placing the road in condition for regular traffic.

However, passenger trains will not be run to the Bay until the spring, according to a recent decision in Ottawa. Railway quarters deny the report published in the local press that the muskeg train had completed its run to Churchill. The train completed its run at Mile 412 as usual. When the train left here recently, it included the private cars of Major J. G. MacLachlan, district engineer, and D. R. Campbell, general superintendent of construction, western region. However, the business cars were taken from Mile 412 to the Bay on a work train. The two officials made an inspection of the Flin Flon and reported everything in order.

Marler Presents Credentials

New Canadian Minister To Japan Received By Emperor

Tokio.—Hon. H. M. Marler, new Canadian minister to Japan, presented his credentials to the Emperor Hirohito. Mr. Marler rode in an automobile of the Imperial household from his hotel to the palace. The ceremony was brief. The foreign minister and minister of the household were present. Japanese Minister Tokugawa also was given farewell audience by the Emperor, prior to his sailing for Canada on the "Empress of France."

Mongolians Mobilize

Tokyo.—Japanese press agency reports state that the outer Mongolian Government is said to have mobilized all men between the ages of 20 and 40, and has ordered two cavalry divisions commanded by Soviet officers to move to the frontier. The report adds that preparations have been made to move 50,000 troops in accordance with developments in the Russo-Chinese situation in Manchuria.

PROMINENT FINANCIER

Sir Robert Botherby, prominent financier, of London, England, who is making a tour of the Dominion with Alfred Shepherd, another British capitalist, with a view to looking over the various industrial and financial institutions here.

Making Trip To West

Premier King To Make Short Visit In October

Ottawa.—Premier Mackenzie King proposes to make a trip, probably to the Pacific Coast, starting about the end of October. It will be a somewhat hurried trip, the prime minister said, but he will make a number of speeches, some of them, in all probability, on the way out to the west. Definite arrangements for the trip have been somewhat held up owing to lack of information as to just when Premier Ramsay MacDonald was coming to Ottawa. It has now been settled that Mr. MacDonald will be in the capital shortly after the fifteenth of October, and Mr. King's trip will begin after the departure of the British prime minister.

Employment On Increase

Ottawa.—Employment in Canada at the beginning of August showed a further marked increase, according to statements tabulated by the Dominion Bureau of Statistics from 6,840 firms whose payrolls aggregated 1,097,812 persons, as compared with 1,070,817 persons on July 1st. The record is unusually good for this time of the year and the index number at 127.8 is a record for all time.

Canada Will Sign

Ottawa.—Canada will certainly sign the optional clause in the statutes of the world court of international justice, Premier Mackenzie King says. Mr. King was asked in regard to discussions which are going on at present in Geneva with respect to the signing of the clause by members of the British Empire.

Guiding 'Planes By Remote Radio Control

Aero Club Given Glance Into Future Of Air Transportation

Philadelphia.—Aeroplane speed of 416 miles an hour and 'planes navigated without a pilot aboard through the medium of remote control by radio were glimpses into the future given to members of the Aero Club of Pennsylvania, and the Rotary Club, by speakers at a joint meeting here. It was G. E. Towse, chief engineer of the Aeronautical Laboratories at the navy yard, who in a technical address discussed speed possibilities. A speed of 416 miles an hour is the maximum which can be delivered by any known present day machine, he said, "although Britain may have an engine up her sleeve" larger than any yet constructed.

Edward P. Howard, chief of the air regulations division of the United States Department of Commerce, disclosed that an application has recently been made for the licensing of a pilotless machine to be navigated by radio impulses.

Police Return Young Donkshobors To Home

Children Made Escape From Institution At Vancouver

Vancouver.—Eight Donkshobor children, seven girls and a boy ranging in age from eight to 16 years, escaped from the children's aid home here, and set out to join their parents at Oakalla jail. In response to an alarm from the matron of the institution police located the youngsters and returned them to the home.

The children were brought here at the same time that more than 100 members of the Sons of Freedom, a sect of Donkshobors, were brought to jail here to serve six months sentences for taking part in a nude parade at South Slokan, B.C.

Imperial Trade Conference

Movement Under Way To Formulate An Empire Trade Policy

London, Eng.—It is understood that attempts are being made to organize an Imperial commercial conference to be held prior to the meeting of premiers of the British Empire at the Imperial Conference in 1930.

It is proposed that each Dominion shall appoint a small delegation representative of the various interests of agriculture as well as business. The delegation will meet in London three months before the premiers and endeavor to hammer out an Empire trade policy which if agreed upon will be submitted to the premiers as a guide in their deliberations.

Young Aristocrats Sail

Standing on each side of Captain J. N. Griffiths, skipper of Canadian Pacific steamship "Montclair," the Hon. John and the Hon. George Rodney, aged 8 and 10 respectively, had just made the 2,000-mile trip from their father's ranch at Fort Saskatchewan, Alberta, unaccompanied across Canada under the care of Canadian Pacific Railway officials. They are on their way to school in England. The elder is eventually destined for Eton, and the younger will enter the navy via training ship at Dartmouth. Their father is the descendant of the famous British Admiral who won the great sea fight at Cape St. Vincent in 1796.

FOR CONTROL AND LIMITATION OF THE DRUG EVIL

Geneva.—The British delegation to the League of Nations assembly has presented a proposal designed to bring out an international agreement for control and limitation of production of heroin, morphine and cocaine. The move was regarded as representing a complete reversal by the Labor Government of the late Baldwin Government's attitude in refusing to enter an agreement seeking to limit manufacture of narcotics.

The new British position was announced to the assembly's committee on social questions by N. Baker, member of parliament. The British recommendation is that the League Council invite the governments of countries in which narcotics are manufactured to confer together as to the possibility of reaching an agreement on the total amount of each of the various forms to be manufactured annually and as to the quota of each that these countries should manufacture. The new attitude adopted by Great Britain brings her into accord with the attitude of Canada, the United States and Italy.

By the British resolution initiative in calling a conference of the States is placed in the League's Council.

British Premier May Call Power Conference

Report Says Invitations Likely To Be Issued Shortly

Washington.—Invitations to the five-power naval conference proposed to be held late in January will be issued by Premier Ramsay MacDonald in the near future, but the exact time remains to be determined.

This was learned here authoritatively recently, and with it came the further information that there would be no joint invitations on behalf of Great Britain and the United States as has been suggested in some quarters. Secretary of State Henry L. Stimson, said published despatches emanating from London, that Premier Ramsay MacDonald already had sent invitations through the British embassies at Tokio, Paris and Rome, were without authorization and entirely inaccurate.

The invitations from the British government will go to the United States, Japan, France and Italy, with all five expected to participate in the conference which it is now proposed shall be held in the British capital.

Considerable preparatory work must be done before the invitations are sent forward through the British embassies. It may be that action would be deferred until after Premier MacDonald has held his conferences with President Hoover, in Washington, early in October, on points still in controversy between the United States and Great Britain on the cruiser question.

Will Represent Japan

Tokio.—Japan's first step in the new movement for naval disarmament was announced recently, when the navy ministry ordered Commander Tamon Yamaguchi, of the navy general staff, to proceed to Washington, to join the Japanese embassy staff there, preparatory to the proposed conference for naval limitation.

To Confer With Hon. Forke

Ottawa.—Hon. George Forke, Minister of Agriculture from Alberta, is in the capital for a conference with Hon. Robert Forke, Dominion Minister of Immigration. While the subject up for discussion was not officially made known, it is understood certain phases of the employment situation in Alberta are to be discussed.

Leads Opera In Germany

Berlin.—Albert Coates, noted conductor, led Boris Godunov, at the State Opera, as the first Englishman to wield the baton of the German Opera since Sullivan, conducted the Mikado many years ago. Mr. Coates was warmly received by the German audience.

Yesterday and Today

Thirty-five years ago the sixth of June last, in a jeweller's shop in a small town across the border, a young U.S. Government clerk, C. Francis Jenkins, using the machine pictured above, which he had just invented, staged the first public exhibition of moving pictures in America.

It remained, however, for the telephone engineer and the scientist, trained in the electrical trans-

mission of sound, to make possible sound picture equipment.

Apparatus similar in all respects to that which has already been installed by Northern Electric engineers in the leading theatres from coast to coast throughout Canada, has also been placed in the large theatres in England, France, Germany, India, Australia, New Zealand, Brazil, West Indies, Central America, China, Japan and some 2,500 in the United States.

Marquette DELIVERS PERFORMANCE

THAT ONLY McLAUGHLIN-BUICK COULD PRODUCE

INTO the Marquette, McLaughlin-Buick has built an extra margin of every quality that makes an outstanding leader. On the road the brilliant performance of this swift, smart new six is unmatched by that of any other car of comparable price.

Only Marquette with its priceless background of McLaughlin-Buick craftsmanship can offer such superlative performance at moderate cost. Only Marquette in its price-class has an engine of 212.8 cubic inch piston displacement. Marquette alone provides the extra endurance and extraordinary economy of operation that McLaughlin-Buick alone knows how to build.

In its class, Marquette

is the only car with the wonderful new non-glare windshield. A host of other exceptional features contributes to its completeness: Dustproof, tilt-ray headlights. Four Lovejoy hydraulic shock absorbers. Big, smooth, completely enclosed brakes. Beautifully sealed engine. Beautiful, harmonizing finish, inside and out. Perfect fittings and appointments.

Here is one of the smartest cars on the road . . . setting the style with new, low-slung, faultlessly tailored bodies by Fisher . . . and providing performance unmatched in its price field. See

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, a singing waiter at Blackie Joe's New York night club, wins fame as a composer of popular songs. Gracie, the cigarette girl at Blackie's, who loves Al without his knowing it, is left behind. He marries Molly Winton, a ballad singer, and makes her famous, too. She does not love him. Molly has a baby, Junior, whom Al adores. Al becomes proud owner of the famous Club-Bonito, and on the night of the third anniversary of his marriage presents his beloved Molly with a diamond brooch. He does not know that Molly, while approaching the club in her limousine, was ardently kissed by his friend, John Perry, who begged her to leave Al. On the way home with Al she is moody. When she sees Al later in the nursery bending devotedly over sleeping Junior, his baby son, her conscience bothers her. This, in turn, makes her angry at her husband.

CHAPTER XIV.

Al heard Molly's step and turned to embrace her. She deftly avoided his grasp, stifling the look of aversion in her eyes as she did so. Al thought nothing of it; he believed she was merely anxious to avoid any noise that might wake Junior. Again he made a move toward the child, but Molly caught his hand. "Sh!" she murmured in an irritated voice. "Don't wake him. I'm tired. He might cry."

Al pretended in earnest pantomime that he had no intention of waking Junior, but, unseen by Molly, his other hand crept toward the protruding toe of the boy. The truth was Al couldn't bear the thought of going to bed without a word or two with little Junior. So, as Molly turned away to go to her own room, Al nudged the baby's foot and smiled to himself. Junior's eyes opened sleepily and, as he recognized his father, he murmured, "Hello, daddy."

At the gentle words Molly turned, a smile stealing over her face in spite of herself. There stood Al, pretending surprise that Junior had awakened, but obviously delighted that it had happened. He quickly leaned over, gathered the baby in his arms and straightened up with the child held close to him. One chubby, soft arm went round his neck.

"Good boy, daddy," whispered Junior, nuzzling closer. "Come home."

Swiftly Al carried his precious bundle toward Molly, who waited, a look of indignation upon her face. She wanted to see Junior and cuddle him, too, yet the sight of his innocent baby face at this moment

sharpened her guilty thoughts and aggravated her irritation toward Al. But Al was holding Junior toward her, so there was nothing to do but take the child in her arms.

"Be more careful," she whispered petulantly. "You're spoiling my orchids."

Al noticed her tone and quickly took Junior from her. But as soon as she had left the nursery and Junior sat down on his father's lap, the baby began to chat volubly. He was thoroughly wide awake and Al forgot his chagrin over Molly's irritability in his delight over Junior. Was any sound as sweet as that high childish trill?

"How big are you, Junior?" he asked.

The baby's tiny arms were spread wide as he gave the required answer: "So-o-o big!"

Al's head went back, as he laughed delightedly, just as if they had not gone through that nursery ritual a thousand times. Then Junior turned and demanded, "Now, daddy, tell me story."

"Story?" repeated Al. "What kind? Animal story, plant story?"

"Frog story," answered Junior briefly, settling down comfortably in Al's protecting arms.

"All right," agreed the father. "Now listen closely. Once there was a fat old froggie who lived in a hole in the ground under a great big tree. He had a big deep voice and—"

Al glanced down—Junior's eyes had closed. He tried desperately to hold them open, but again they went shut as the story continued.

When the tale was ended he was sleeping quietly. Then Al, singing to him softly, put him back into his bed and tucked him in. His toy was placed beside his open hand where he would see it first thing in the morning, and then—one last adoring look, a quick kiss, and Al tip-toed from the room.

Molly had disrobed the moment she reached her room and slipped into a negligee. But her door was open and, as she went about the business of cold-creaming her face, she could not help but hear the sounds of joy and perfect comradeship that came from the nursery. Somehow, they cut into her consciousness like acid on a raw wound, so that she quite forgot what she was doing. The nagger she had felt and stifled when she entered the apartment now returned in greater force than ever. It seemed to her that everything that Al had done tonight irritated her. Even his presentation of the brooch had a bad conclusion, for it had made John Perry discreetly withdraw from the party. And Al's pride in her and love for her, instead of soothing her vanity, worked just the other way.

At this moment she glanced in the

mirror to see Al approaching from behind, his face aglow with that same expression of joy and devotion. As he came closer and slipped his arms around her she jumped up and stepped out of the embrace, making no attempt to hide her displeasure. Before Al could say anything in protest she had crossed the room.

He shook his head in astonishment. Oh, well, he thought philosophically, it was just another of Molly's moods. He made a move to cross over to her, but suddenly Molly's white arms went above her head in protest. She stood glaring at him, like an animal at bay.

"What's the matter with you, Molly?" he asked sharply, in amazement. "What have I done? For weeks you haven't seemed like yourself!"

There was challenge in Al's voice, but there was pleading, too. The expression of aversion left Molly's face; desperately she struggled to think of an explanation that would smooth things over. But it was no use—he had gone too far; there was no turning back.

"What is it, darling?" Al pleaded. "Can't you tell me? Haven't you everything to make you happy—a beautiful home—a baby—me?"

But Molly meant to know harder with every word he uttered. Her icy silence, as she confronted him with gleaming eyes, sent a dreadful current of fear through him. Was there nothing he could say to

smooth her? To drive out this evil spirit and bring back the Molly he loved. He said with a controlled quietness that gave no hint of his madly throbbing heart:

"You act as though you didn't love me—any more. To 'Daddy' you?"

At that Molly's head came up. It was as if she had been waiting, trying to force him to a showdown. Now she was ready to speak.

"I don't love you any more."

The dreadful words were spoken slowly and soberly, but the minute they were out a look of disdain curled her lips and her eyes flashed defiance. Now—at last—she had

clean. Now, her attitude said, what was he going to do about it?

Al recoiled as if she had struck him across the face with a whip. The words seemed to travel swiftly down interminable corridors in his brain, and came echoing back.

But finally Molly could stand the silence no longer.

"You heard me!" she exclaimed harshly. "I meant it. I don't love you! Do you understand? I don't love you! Now let me alone!"

The last remark was shot at him with deadly aim and purpose, as she might have thrown a burning, blinding faggot. It was all over now, she thought; there would be no more pretending on her part. This was the climax of the storm that had been gathering force within her for more than a year. She didn't love him; in fact, she hated him now with a terrible intensity because he had made her feel unworthy by loving her too much. She wanted to hurt him with all the cruelty in her power, driving forever that adoring look from his eyes.

Al did not cringe as he listened to her, yet he knew at last that their life and comradeship together were utterly smashed. His face was pale as death. But as they faced each other, eyes agleam, hands clinched, they heard another sound like the faint sweet tinkle of a bell. It was Junior's voice, calling gently:

"Mamma. Please come to me."

(To Be Continued.)

Car Accidents in Iceland

Increasing Number Of Automobile Accidents Presents a Problem

Iceland, of all places under the sun, is complaining of its growing number of automobile accidents.

Just like Chicago and New York and London, this metropolis has its careless drivers and its drunken drivers. And all of this, of course, makes for more accidents.

An auto bus took a turn in a country road too rapidly. Two passengers were killed and the others injured. Icelandic authorities halted the driver into court, found that he conducted his bus in a most careless manner and sentenced him to a month in jail. His license was taken away permanently.

Dyeing this way makes faded Dresses NEW

DIAMOND DYES are the finest dyes you can buy. They are made to give you real service. They contain the very highest quality anilines that can be produced.

It's the quality of the anilines in Diamond Dyes that give such soft, bright, new-looking colors; that make them go on so evenly—without spotting or streaking; that enable them to keep their depth and brilliance through wear and washings. Next time you have dying to do, try Diamond Dyes. See how easy and simple it is to use them. Then compare results. You will surely agree Diamond Dyes are better dyes. The white package of Diamond Dyes

is the highest quality dye, prepared for general use. It will dye red silk, wool, cotton, linen, rayon or any mixture of materials. The blue package is a special dye, for silk and wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. When you buy—remember this. The blue package dyes silk or wool only. The white package will dye every kind of goods, including silk and wool. Your dealer has both packages.

Diamond Dyes

Sun Proof

EASY TO USE—BETTER RESULTS

Diamond Dyes contain the highest quality anilines money can buy. And it is the anilines that count. They are the life of the color; brilliance and permanence.

Idea May Be Feasible

Berlin To New York In Six Hours Is Plan Of Young Eastger

"Take a solid breakfast in Berlin and don't worry about food on the plane. You can have lunch in New York!"

This might be the last advice given by good friends to a passenger of a futuristic airplane not yet constructed, but planned by Heinz-Guenther Perl, a 21-year-old Berlin engineer. Perl claims that his 'plane would make the trip from Berlin to

New York in about six hours, saying that world-famous scientists and experts like Professor Einstein and Count Arco studied his device carefully, approved of it and now firmly believe in its feasibility.

The Coming Era

The air age will have fully arrived when trans-oceanic flights are made without the accompaniment of big headlines in the papers.

Birds cannot see blue or violet, but they do see red and infra-red.

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach serves have been over-stimulated, and food rots. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has retained the standard with physicians in the 50 years since its invention. One spoonful of this harmless,

tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting stomach acids. Each bottle contains full directions—any drugstore.

Stony Plain and District.

Mr Lorne Outway left this week, to resume his studies at the U. of A.

Mr Carl Fischer has been confined to his house this week, thru illness.

Mr Art Winter, who held a sale on Saturday last, when business engagements permit, is leaving on a trip to the Coast.

There is on display in The Sun window 3 potatoes raised by Corp. Moses in his garden. The samples are Netty Gems, one weighing 26 oz. and another 20 oz. The C.P.R. dining service pays a premium of 25c a bu. on this variety of spud.

Sunday's storm has put a stop to stook threshing for the present. A big percentage of the grain fields had been cleaned up before the storm broke.

The Women's Institutes of District No. 2 (Mrs Short of Woodbend, Convenor) will hold their annual convention at Duffield on Thursday next Oct. 3d. Stony Plain W. I. will attend in a body, it is expected.

The Coming Auction Sales: R N & H N Brumet, at Holborn, Wed. Oct. 2.

Messrs R N and H N Brumet, who have been farming for several years on the Jac Strassburger half section at Holcorn, will hold a clearance sale of their stock, implements and household goods, on Wednesday next Oct. 2d. There is no reserve on these, as Messrs Brumet intend moving back to U.S.A., following the sale.

Fire at the Power House.

On Saturday night, when the load at the power house was at the peak, the roof on the west side was discovered to be on fire. The fire had evidently caught from the flame from the exhaust pipe blown over the west wind. Electrician Trapp and Mr W Robertson were first on the scene with waterpails and extinguishers, and their efforts were supplemented by a small crowd of volunteers, who extinguished the blaze in a short time. Owing to a defect in the pumping system, the plant was forced to close down at an early hour on Tuesday morning.

Highway Patrol.

The traffic squad which was operating on the Baseline at intervals during the summer season have apparently quit the work and left the regulating to other hands. While Corp. Moses was returning from the City Friday midnight he was met by a truck loaded with cattle which was traveling at a speed greater than 40 m.p.h. Shortly after he met a jitney driven by a boy without a driver's license who said he was "taking lessons." The youth had a lot of courage for a green driver, as he was said to be driving a strange car on a new road on a dark night and speeding around 40 m.p.h.

Slipped Off the Grade.

While repair car No. D1865 from an Edmonton garage, was traveling west along the Baseline on Sunday, near Mr Fred Tyrkalo's corner, the machine slipped off the grade on one of the bends thereabouts. The driver of the car was hurrying up to Duffield, from where an SOS had been sent out by a stranded auto party. The crew of the repair car, in an effort to get their bus back on the road, had hitched a line onto one of Fred's fence posts, when over came the post, and the car was left left Monday, when it was retrieved by another wrecking party.

Spruce Grove News

Mr Pearcey has completed a new garage at the rear of teachers.

Thru a misunderstanding, there is a possibility that the Grove will not be hooked up with the Calgary Power line for some time to come.

Everything to please the eye and tempt the palate can be seen each day now on the marble slab at the MacKean Meatery.

The Grove, also, seems to be suffering from the prevailing news famine.

Here and There

(383)

"The greatest apple crop in the history of Nova Scotia," is the almost unanimous opinion expressed by prominent fruit growers and Government experts of the province. It is estimated the crop will reach 2,600,000 barrels, at least half a million barrels more than any other crop ever raised in Nova Scotia.

In preparation for the opening of the 1929 big game hunting season in New Brunswick, 25,000 hunting licenses have been sent out from the Department of Lands and Mines to 800 vendors in all parts of the province.

E. W. Beatty, chairman and president of the Canadian Pacific Railway, accompanied by a group of directors of the company, is now on his annual tour of inspection of company's properties and conditions in the west. Resorts, agricultural centres, experimental farms, mines and smelting plants, as well as the system itself was inspected during the tour which started September 5 from Montreal and closes at Winnipeg October 2.

"I am watching with the greatest interest the progress being achieved in the United States where railways are experimenting in the use of aeroplanes as adjuncts to their railway services," said E. W. Beatty, chairman and president of the Canadian Pacific Railway, interviewed at Toronto recently. "There they are using planes by day to certain places and rail travel by night and the experiments are very interesting to me," the president added.

Two first prizes, three seconds, and a third award were won by the Canadian Pacific Railway supply farms championship Holstein herd from Strathmore, Alta., at the 50th annual provincial exhibition at New Westminster recently. This is a follow-up to the Vancouver Show where the herd led all others.

Up to the end of August, says Colonel J. S. Dennis, chief commissioner of the railways department of colonization and development, the Canadian Pacific brought to Canada 1792 boys for placement in agricultural equipment under the distributive scheme of the company. "This is the largest number of British boys brought out to the Dominion by any one organization," says the Colonel.

Back from a month's wanderings along the line of the Dominion Atlantic Railway in Nova Scotia, Miss Juliette Gaultier de la Verendrye, noted folksong artist, stated that she had discovered 300 folksongs that were either quite unknown hitherto or else were interesting variants in melody and tune to similar songs in vogue among the French-Canadian habitants. She will sing some of them at forthcoming concerts.

During the first five months of the year 5,335 head of cattle representing 862,240 acres of land were taken out in Alberta, settlement being mainly in the Edmonton, Grande Prairie, Peace River and Prince Albert districts.

Card of Thanks.

Mr Wm. E. Gellhouse and Family wish to express their gratitude to their friends in Stony Plain and District for their sympathy shown on the occasion of their recent and bereavement.

Ford

The Finest Car Made at a Low Price.

Back of the new Ford are manufacturing and production methods, as unusual as the car itself. Without these it would be impossible to give you the value that is in the New Ford. Because of them it is unquestionably the best motor car that can be made at a low price without sacrificing quality anywhere on it. We make immediate deliveries on all models.

STONY PLAIN

Stony Plain Motors.

ENDERS & BARON, Stony Plain.

Compare OAKLAND with higher-priced cars

THE ranks of enthusiastic Oakland owners are filled with motorists who demanded the size, performance, beauty and comfort of a fine-quality six . . . and who found them all in Oakland. They compared Oakland with cars far above Oakland in price . . .

They weighed carefully Oakland's many mechanical advantages . . . the big, 62-h.p., high-compression engine with C.M.R. non-detonating cylinder head . . . the Harmonic Balancer that eliminates crankshaft vibration . . . the 1 1/2-inch carburetor with accelerating pump . . . the special bronze-backed main bearings . . . the crankcase ventilation . . . oil filter . . . air cleaner . . . and dozens of others.

They considered the smart, original beauty of Oakland's Bodies by Fisher . . . the interior luxury of mohair upholstery, Terner fittings, foot-controlled tilt-ray headlights, VV windshield.

They looked at the special features that provide the "EXTRA" measure of satisfaction, such as Lovejoy Hydraulic Shock Absorbers . . . dust-and-weather proof four-wheel brakes . . . thermally controlled cooling . . . rubber "biscuit" engine mountings . . . and so forth.

And very wisely they selected Oakland Six as the greatest value in its class. Come in! Drive Oakland Six and learn the reasons on which their choice was based.
